Contents Volume 49

Contents

Editor's Corner: A Tongue-in-Check Look at Fun and/or Games
R.L. Glass 1

A conceptual basis for feature engineering
C.R. Turner, A. Fuggetta, L. Lavazza and A.L. Wolf 3

Measurement processes are software, too
M. Morisio 17

Cost estimation based on business models
S. Moser, B. Henderson-Sellers and V.B. Mišić 33

Software reliability prediction incorporating information from a similar project
M. Xie, G.Y. Hong and C. Wohlin 43

Generating test data from SOFL specifications
A.J. Offutt and S. Liu 49

A performance model interchange format
C.U. Smith and L.G. Williams 63

An assessment of systems and software engineering scholars and institutions (1994–1998)
R.L. Glass 81

Special section on achieving quality in software
A. Bertolino and F. Fabbrini 87

Quality in use: Meeting user needs for quality
N. Bevan 89

An automatic approach of domain test data generation
B. Jeng and I. Forgács 97

Guest Editor's Corner: Software engineering education and training for the next millennium
H. Saiedian 113

A real-world case study in information technology for undergraduate students
K. Sikkel, T.A.M. Spil and R.L.W. van de Weg 117

Strategies for industrial relevance in software engineering education
C. Wohlin and B. Regnell 125

Providing new graduate opportunities: experiences with a UK master's level computing conversion course
J. Barrie Thompson and H.M. Edwards 135

Teaching software project management: a response–interaction approach
M.G. Murphy 145

Integration of computer security into the software engineering and computer science programs
R.B. Vaughn Jr. and J.E. Boggess III 149

Industry/university collaborations: different perspectives heighten mutual opportunities
N. Mead, K. Beckman, J. Lawrence, G. O'Mary, C. Parish, P. Unpingco and H. Walker 155

Guidance for the development of software engineering education programs
T.B. Hilburn, G. Hislop, D.J. Bagert, M. Lutz, S. Mengel and M. McCracken 163

An information systems-centric curriculum ISCC '99
D.K. Lidtke and G. Stokes 171

Software developer perceptions about software project failure: a case study
K.R. Linberg 177
